Tetracon Company Profile

We have positioned Tetracon (Pvt.) Ltd. to fulfill and support Pakistan's Oil & Gas, Power and Industrial Sector's need for gas detection, monitoring and analysis applications. Having signed world-leading manufacturers engaged in R&D and equipment manufacturing for these applications, we are fully equipped to supply and commission systems to the satisfaction of our end users.

About Us

TETRACON (Pvt.) Ltd. is a diversified conglomerate for product sales and project execution in Oil & Gas, Power, Pharmaceutical and Manufacturing / Processing Sector having a strong suite of International partnerships. We offer state of the art products from World leading brands and services via highly experienced manufacturer trained engineers for an uncompromised user experience.

OUR VISION

Establish Proficiency and Professionalism through harmonized systems and dedicated HR.

OUR MISSION

Offering a streamlined user experience with state of the art products and swift service backup.

OUR CORE VALUES

01 INTEGRITY

Our actions and decisions are in accordance with high ethical & moral standards.

02 ACCOUNTABILITY

We take responsibility for our decisions and actions.

03 FLEXIBILITY

We respond and adapt to challenges.

04 SUPPORT

We provide optimal support to our end users.

05 FOCUS

We work collectively towards a shared vision with optimism and tenacity.

06 KNOWLEDGE

Our passion for continued learning drives our innovation.

Our Principal Manufacturers

TETRACON (Pvt.) Limited has earned its reputation for quality through the satisfaction of our customers. We are known for our high-quality workmanship, along with professionalism, integrity and knowledge of the field. TETRACON (Pvt.) Limited has a strong suite of International partnerships and currently represents these companies in the capacity of sole authorized agent in Pakistan Territory.

DWYEROMEGA

Unified process instrumentation portfolio spanning pressure, temperature, flow, level and environmental monitoring.

Official Website
www.dwyeromega.com

PRINCIPAL MANUFACTURER · 01 / 18

DWYEROMEGA

DwyerOmega brings together Dwyer Instruments and Omega Engineering, two long-established names in process instrumentation, under a single unified brand. Together they deliver one of the industry's broadest instrumentation portfolios spanning pressure, temperature, flow, level and data acquisition, backed by combined manufacturing depth and shared engineering standards for HVAC, industrial and process markets worldwide.

Product Range

Pressure Measurement

Flow Measurement

Environmental Monitoring

Temperature Measurement

Level Measurement

Process Instrumentation

Product Portfolio

Magnehelic Series 2000 Differential Pressure Gauge

Precision differential pressure gauge engineered for reliable filter, duct and low-pressure process monitoring across industrial automation systems.

Submersible Level Transmitter

Rugged submersible transmitter delivering continuous, accurate hydrostatic level measurement for tanks, wells and open-channel applications.

Thermocouples & RTD Temperature Probes

Industrial-grade thermocouple and RTD probes engineered for precise, repeatable temperature measurement across demanding process environments.

Variable Area Flowmeter RM Series

Direct-reading variable area flowmeter delivering dependable flow indication for liquids and gases in process and utility systems.

MICHELL INSTRUMENTS LTD.

Precision instrumentation for dew point, moisture and oxygen analysis across critical process industries.

Official Website
www.michell.com

PRINCIPAL MANUFACTURER · 02 / 18

MICHELL INSTRUMENTS LTD.

Michell Instruments specializes in high-precision sensing technology for dew point, relative humidity and oxygen analysis, drawing on more than 40 years of applications expertise. The company serves the petrochemical, pharmaceutical, power generation and food processing sectors from three manufacturing facilities in Oosterhout (Netherlands), Lyon (France) and Ely (UK), supported by a global network of factory-trained application engineers and distributors.

Product Range

Dew Point Analyzers / Transmitters

Moisture Analyzers / Hygrometers

Oxygen / H₂S Analyzers

Product Portfolio

XZR400 Oxygen Analyzer

Industrial zirconia oxygen analyzer engineered for continuous process monitoring, quality assurance and combustion efficiency optimization.

Easidew EA2 Dew-Point Transmitter

In-line dew-point transmitter delivering fast, drift-free trace moisture measurement for reliable performance across demanding process gases.

Condumax II Hydrocarbon Dew-Point Analyzer

Automatic chilled-mirror hydrocarbon dew-point analyzer built to custody-transfer accuracy for pipeline and natural gas quality assurance.

QMA601 Process Moisture Analyzer

Quartz crystal microbalance moisture analyzer delivering fast, drift-free trace moisture measurement for demanding process-critical environments.

RB TECHNOLOGIES

Combustion gas analysis technology engineered for safety, efficiency and emissions performance.

Official Website
www.rb-technologies.com

PRINCIPAL MANUFACTURER · 03 / 18

RB TECHNOLOGIES

RB Technologies applies more than 20 years of specialized experience in combustion gas analysis to deliver safe, low-maintenance analyzer solutions for oil & gas, pharmaceutical, chemical, energy and waste-treatment operators. Its in-situ zirconia and combustion-optimization systems support real-time control of burner efficiency and emissions compliance in process-critical environments.

Product Range

Innovation Development

Waste Treatment

Oil & Gas

Combustion Optimisation

Product Portfolio

CO2 / O2 Analyzer

In-situ combustion gas analyzer providing direct CO2 and O2 measurement for real-time burner control and combustion efficiency management.

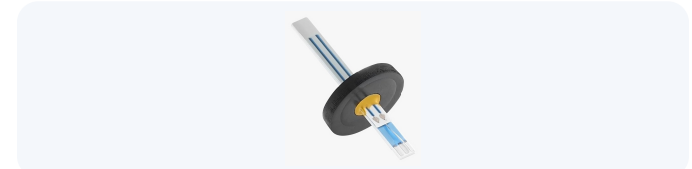

O2 + COe ZTR3 Analyzer

Zirconia-based in-situ analyzer combining oxygen and combustible-gas measurement within a single explosion-proof enclosure for hazardous-area service.

O2 + COe ZTR4 Analyzer

Next-generation in-situ oxygen and combustibles analyzer delivering fast response and reduced maintenance for continuous combustion monitoring.

Zirconia Combustion Gas Sensor

Solid-state zirconia sensing cell providing dependable oxygen measurement to support combustion efficiency and emissions optimization programs.

GALVANIC APPLIED SCIENCES INC.

Engineered gas and liquid measurement systems for custody-transfer and process-critical analysis.

Official Website
www.galvanic.com

PRINCIPAL MANUFACTURER · 04 / 18

GALVANIC APPLIED SCIENCES INC.

Galvanic Applied Sciences engineers rugged, fit-for-purpose gas and liquid measurement systems that resolve critical process-analysis challenges for customers worldwide. Its instrumentation is designed to deliver uncompromising accuracy, long-term reliability and measurement integrity, even in the most demanding process environments.

Product Range

Gas Chromatographs

H₂S / Total Sulfur Analyzers

Gas Chromatograph – BTU & HC

Electronic Volume Correctors

Product Portfolio

FPA 4100

Process gas chromatograph configured for precise compositional analysis and BTU verification in custody-transfer applications.

H₂S / Total Sulfur Analyzers

Continuous online analyzers delivering accurate hydrogen sulfide and total sulfur measurement for natural gas quality and safety compliance.

Gas Chromatograph – BTU & HC

Heating-value and hydrocarbon composition analyzer package engineered to support custody-transfer accuracy and process reporting.

Electronic Volume Correctors

Field-ready gas volume correction instrumentation delivering compensated flow measurement and accurate custody-transfer reporting.

QED ENVIRONMENTAL SYSTEMS LTD.

Environmental monitoring and remediation instrumentation for landfill, groundwater and soil-gas compliance.

Official Website
www.qedenv.com

PRINCIPAL MANUFACTURER · 05 / 18

QED ENVIRONMENTAL SYSTEMS LTD.

QED Environmental Systems designs monitoring and remediation equipment, precision-engineered pumping systems and gas instrumentation that support environmental compliance programs worldwide. Its field-proven technology serves landfill operators, environmental consultants and regulatory monitoring programs across groundwater, soil and landfill-gas applications.

Product Range

Field Sampling

Groundwater Sampling

Soil Sampling

Landfill Products

Product Portfolio

BIOGAS 3000 ATEX Certified Analyzer

ATEX-certified biogas analyzer engineered for continuous methane, CO2 and H2S monitoring in hazardous-area landfill and digester applications.

Carbon Dioxide Analyser G150

Portable carbon dioxide analyzer delivering precise soil-gas and landfill CO2 measurement for environmental compliance surveys.

GEM PRO Landfill Gas Analyzer

Advanced portable landfill gas analyzer providing real-time methane, oxygen and CO2 data for well-field monitoring and regulatory reporting.

MicroPurge MP100 Peristaltic Pump System

Low-flow peristaltic groundwater sampling system engineered for representative, low-disturbance sample collection at monitoring wells.

NTRON GAS MEASUREMENT

Oxygen measurement sensors and analyzers engineered for process safety and product quality assurance.

Official Website
www.ntron.com

PRINCIPAL MANUFACTURER · 06 / 18

NTRON GAS MEASUREMENT

Founded in 1987, NTRON supplies oxygen-measurement sensors and analyzers to a significant global customer base spanning OEMs and end-users in additive manufacturing, pharmaceutical and high-purity gas industries, where product quality, personnel safety and process efficiency are critical operating requirements.

Product Range

Medical Gas Analyzers

Oxygen and Gas Measurements

Oxygen Control for Additive Manufacturing

Process Oxygen Analyzers

Product Portfolio

SIL O2 Oxygen Analyzer

DIN-rail oxygen analyzer engineered for safety-instrumented systems, delivering dependable process oxygen measurement and compliance assurance.

Microx Oxygen Analyzer

Compact oxygen analyzer platform providing precise process control for industrial gas and additive-manufacturing environments.

OxyExtract Oxygen Sampling System

Insertion-style oxygen measurement solution enabling direct sampling and rapid process verification without system shutdown.

Yellow Box Portable Oxygen Analyzer

Portable oxygen analyzer built for fast, reliable field checks, maintenance support and process troubleshooting.

ROTRONIC

GAMP- and FDA-compliant measurement instrumentation for humidity, temperature and regulated environmental monitoring.

Official Website
www.rotronic.com

PRINCIPAL MANUFACTURER · 07 / 18

ROTRONIC

Rotronic engineers measurement instruments and monitoring solutions built for ease of use, minimal maintenance and conformance with GAMP and FDA requirements. Beyond humidity and temperature measurement, its portfolio extends to CO₂, differential pressure, flow, dew point, water activity and analog signal monitoring for industrial and regulated environments.

Product Range

Temperature & Humidity Measurement

CO₂ / O₂ Measurement

Water Activity & Dew Point

Pressure / Differential Pressure

Product Portfolio

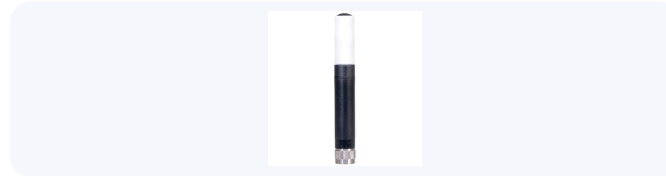

HygroPalm HP32

Handheld humidity and temperature instrument engineered for accurate spot checks, commissioning and service verification.

PF4 Differential Pressure Transmitter

Differential pressure transmitter delivering precise, stable readings for cleanroom, HVAC and controlled-process monitoring.

HC2A-S Humidity Probe

High-stability humidity and temperature probe delivering precise, drift-resistant measurement for demanding industrial and regulated environments.

RMS Data Logger

Compliance-grade monitoring system data logger delivering secure environmental recording, alarm handling and audit-ready reporting.

LDETEK INC.

Gas chromatography and trace-impurity detection systems for industrial gas and process purity analysis.

Official Website
www.ldetek.com

PRINCIPAL MANUFACTURER · 08 / 18

LDETEK INC.

LDetek designs and manufactures gas chromatography solutions, including highly sensitive plasma detectors, patented stand-alone chromatographic systems, compact online analyzers and supporting accessories for the industrial gas, semiconductor, environmental, energy and food & beverage markets.

Product Range

Analysis Software

Plasma Detectors

Gas Chromatographs

Online Gas Analyzers

Product Portfolio

LD8001 Analyzer

Compact online gas chromatograph with integrated touchscreen control, engineered for continuous purity verification and trace-impurity analysis.

LDpms

Plasma-emission detector platform delivering ultra-sensitive measurement of trace contaminants and impurities in high-purity gas streams.

LDsenz

Compact online gas-analysis solution engineered for continuous purity monitoring and trace-gas verification.

MultiDetek 3

Rack-mounted multi-detector gas chromatography system delivering simultaneous multi-channel analysis through a high-resolution touchscreen interface.

STATUS SCIENTIFIC CONTROLS LTD.

Fixed gas detection instrumentation
and control panels engineered for
hazardous-area industrial safety.

Official Website
www.status-scientific.com

PRINCIPAL MANUFACTURER · 09 / 18

STATUS SCIENTIFIC CONTROLS LTD.

Status Scientific Controls manufactures fixed-gas detection instruments, refrigerant identifiers and analyzers, together with a comprehensive range of control panels. Backed by more than 30 years of applications experience, its products apply proven gas detection technology across hazardous and non-hazardous industrial areas worldwide.

Product Range

Gas Sensors

Gas Detector Control Panels

Gas Sensor Heads

Refrigerant Gas Identifiers

Product Portfolio

Gas Sensor Head

Field-mounted gas sensor head engineered for dependable fixed-point toxic, flammable and refrigerant gas detection.

Refrigerant Gas Identifier

Portable refrigerant identification instrument that verifies gas composition and reduces the risk of service-side cross contamination.

Gas Sensors

Industrial gas-sensing devices engineered for fixed safety systems and continuous hazardous-area monitoring.

Gas Detector Control Panels

Single- and multi-channel control panels delivering reliable alarm processing, indication and plant safety integration.

ANALYTICAL INDUSTRIES INC.

Advanced oxygen sensing technology for industrial process control, medical and specialty gas applications.

Official Website
www.aii1.com

PRINCIPAL MANUFACTURER · 10 / 18

ANALYTICAL INDUSTRIES INC.

Analytical Industries Inc. has built a reputation for innovative gas-analysis solutions, including advanced oxygen sensors and analyzers for industrial process control, natural gas, medical oxygen and diving applications, as well as PPM-level H₂S and trace oxygen measurement.

Product Range

Sport Diving O₂ Sensors

Industrial Process Control

Natural Gas Applications

Medical O₂ Sensors

Product Portfolio

GPR-1200 Oxygen Analyzer

Precision benchtop oxygen analyzer delivering stable, repeatable readings for laboratory calibration and industrial gas-purity verification.

GPR-2800 Oxygen Analyzer

Explosion-proof oxygen analyzer engineered for continuous process monitoring, combining fast response with wide-range measurement accuracy.

Oxygen Sensor XLT Series

Extended-life galvanic oxygen sensor engineered for demanding industrial and medical applications requiring long-term measurement stability.

Palm O₂ Oxygen Analyzer

Rugged handheld oxygen analyzer built for fast field verification, calibration checks and portable gas-purity spot testing.

SST SENSING LTD.

Oxygen and liquid-level sensing solutions engineered for fluid and gas-measurement precision.

Official Website
www.sstsensing.com

PRINCIPAL MANUFACTURER · 11 / 18

SST SENSING LTD.

SST Sensing Limited is a global provider of oxygen-measurement and liquid-level sensors. Operating from Scotland for more than 15 years, the company designs fluid and gas-sensing solutions ranging from standard catalog sensors to bespoke engineered products tailored to customer specifications.

Product Range

Optical Oxygen Sensors

Liquid Level Switches

Zirconia Oxygen Sensors (OXY-FLEX)

Carbon Dioxide Sensors

Product Portfolio

Sprint IR Sensor

Fast-response infrared carbon dioxide sensor engineered for high-speed CO2 measurement and seamless instrumentation integration.

Zirconia Oxygen Sensors

Solid-state zirconia sensors delivering dependable oxygen measurement for industrial gas analysis and combustion efficiency applications.

LuminOx Optical Oxygen Sensors

Optical oxygen sensors providing stable, low-maintenance monitoring with digital output and extended service life.

Optical Liquid Level Sensors

Solid-state optical sensors engineered for precise point-level liquid detection in tanks, appliances and process equipment.

Building automation sensors
engineered for reliable HVAC
temperature, humidity and pressure
control.

Official Website
www.aci-controls.com

PRINCIPAL MANUFACTURER · 12 / 18

ACI

ACI (Automated Controls Inc.), part of the DwyerOmega family of brands, designs and manufactures a broad line of sensors for building automation and HVAC systems, delivering reliable temperature, humidity, CO2 and pressure sensing for commercial and industrial environments.

Product Range

Portable Calibration Instruments

Current Sensors & Switches

Differential Pressure Transmitters

Relative Humidity Sensors

Product Portfolio

ACP Series Temperature Sensor

Rugged, calibration-grade portable temperature sensor kit engineered for precise field verification and commissioning of HVAC temperature control systems.

ACSX / AMCS Series Current Sensor & Switch

Compact current sensor and switch delivering reliable equipment-status monitoring and fault detection for motors, fans and pumps in building automation systems.

AML2 Series Differential Pressure Transmitter

Low-range differential pressure transmitter delivering accurate airflow and filter-status monitoring for HVAC and critical building pressure control applications.

ARH Series Relative Humidity Sensor

Wall-mounted relative humidity sensor engineered for precise indoor air-quality monitoring and humidity control across commercial and industrial HVAC systems.

MILJOCO

NSF-listed pressure and temperature instrumentation for foodservice, HVAC and industrial process markets.

Official Website
www.miljoco.com

PRINCIPAL MANUFACTURER · 13 / 18

MILJOCO

Incorporated in 1979 and headquartered in Michigan, Miljoco designs, manufactures and distributes cost-effective temperature and pressure instruments, recognized for NSF-listed vapor-actuated dial thermometers and dependable industrial gauges serving foodservice, HVAC and process markets.

Product Range

Bimetal Dial Thermometers

Liquid-in-Glass Thermometers

Pressure & Temperature Gauges

Industrial Instrumentation

Product Portfolio

B3099L Dial Thermometer

Stainless steel bimetal dial thermometer engineered for accurate, rugged temperature indication in process piping and HVAC systems.

Liquid-in-Glass Thermometer

Industrial liquid-in-glass thermometer delivering precise, dependable temperature readings for process monitoring and mechanical system applications.

PB3008 Pressure + Temperature Gauge

Combination pressure and temperature gauge providing simultaneous dual-parameter indication for boiler, hydronic and process monitoring applications.

V4509A Dial Thermometer

Compact duct-mount dial thermometer engineered for reliable HVAC temperature indication in commercial and industrial installations.

WEISS INSTRUMENTS

Precision-calibrated thermometers and pressure gauges built for rugged HVAC and industrial service.

Official Website
www.weissinstruments.com

PRINCIPAL MANUFACTURER · 14 / 18

WEISS INSTRUMENTS

Weiss Instruments, part of the DwyerOmega family of brands, manufactures a comprehensive line of bimetal thermometers, RTD temperature sensors and industrial pressure gauges, recognized for rugged construction and precision calibration across HVAC, process and industrial applications.

Product Range

Bimetal Thermometers

Industrial Pressure Gauges

RTD Temperature Sensors

Process Thermometers

Product Portfolio

Bimetal Thermometer

Rugged dial thermometer engineered for dependable local temperature indication in field service applications.

Industrial Pressure Gauge

Precision pressure gauge delivering accurate indication for industrial and mechanical system monitoring.

RTD Temperature Sensor

RTD sensor engineered for precise temperature feedback in process control and equipment monitoring applications.

Process Thermometer

Process-ready thermometer delivering continuous, reliable indication in demanding plant environments.

UFM

Non-intrusive ultrasonic flow measurement technology for process, utility and industrial applications.

OFFICIAL WEBSITE
www.ufm.com

PRINCIPAL MANUFACTURER · 15 / 18

UFM

UFM, part of the DwyerOmega family of brands, specializes in ultrasonic flow measurement solutions for liquids and gases. Its clamp-on and inline flow meters deliver non-intrusive, high-accuracy measurement for process, utility and industrial applications without requiring pipe penetration.

Product Range

Clamp-On Ultrasonic Flow Meters

Inline Ultrasonic Flow Meters

Doppler Ultrasonic Flow Meters

Portable Flow Meters

Product Portfolio

Clamp-On Ultrasonic Flow Meter

Non-intrusive flow meter delivering accurate liquid flow measurement without breaking the pipe or interrupting process flow.

Inline Ultrasonic Flow Meter

Inline ultrasonic meter engineered for stable, high-accuracy continuous process flow monitoring.

Doppler Ultrasonic Flow Meter

Doppler-based ultrasonic flow meter delivering dependable flow verification for aerated and particulate-laden liquids across industrial process and utility metering applications.

Portable Flow Meter

Portable ultrasonic flow meter engineered for field surveys, diagnostics and temporary flow verification.

SENSOSCIENTIFIC

PRINCIPAL MANUFACTURER · 16 / 18

SENSOSCIENTIFIC

Since 2005, SensoScientific, part of the DwyerOmega family of brands, has provided wireless temperature and environmental monitoring systems for hospitals, pharmacies, laboratories and the food industry. Its cloud-based, FDA 21 CFR Part 11 compliant systems deliver 24/7 monitoring, instant alerts and automated compliance reporting.

Product Range

Wireless Temperature Monitors

Differential Pressure Monitors

Cloud-Based Data Loggers

Vaccine Monitoring Systems

Product Portfolio

Differential Gauge (HVAC)

Analog differential pressure gauge engineered for reliable filter and airflow monitoring across cleanroom, pharmacy and HVAC compliance applications.

Differential Pressure Monitoring Sensor

Wireless differential pressure sensor delivering continuous compliance monitoring and instant alerting for regulated healthcare and pharmaceutical spaces.

Digital Temperature Probe

Handheld digital temperature probe delivering fast, accurate spot verification for cold-chain, laboratory and pharmaceutical compliance checks.

In-Transit Ultra-Low Cellular Monitor

Cellular-connected ultra-low temperature monitor delivering real-time in-transit visibility and automated compliance alerts for sensitive cold-chain shipments.

Cloud-based wireless environmental monitoring systems for FDA 21 CFR Part 11 compliance.

OFFICIAL WEBSITE
www.sensoscientific.com

LASCAR ELECTRONICS

Data logging and wireless monitoring solutions for temperature, humidity and industrial process visibility.

OFFICIAL WEBSITE
www.lascarelectronics.com

PRINCIPAL MANUFACTURER · 17 / 18

LASCAR ELECTRONICS

Founded in 1977, Lascar Electronics is part of the CIMSENSE group and serves customers worldwide from the United Kingdom, the United States and Hong Kong. The company is recognized for EasyLog data loggers, cloud-based environmental monitoring, programmable PanelPilotACE displays and EL-IOT connected monitoring solutions for temperature, humidity and industrial process visibility.

Product Range

USB Data Loggers

Temperature Data Loggers

Humidity Data Loggers

Environmental Monitoring

Wireless Monitoring

EasyLog Cloud

PanelPilotACE Displays

EL-IOT Series

Product Portfolio

Temperature and Humidity Monitor

Wall-mounted temperature and humidity sensor delivering continuous environmental monitoring and wireless data visibility for critical storage and process spaces.

USB Data Logger

Compact USB temperature data logger providing standalone recording and rapid PC download for cold-chain and environmental compliance monitoring.

Vaccine Logger

Dedicated vaccine monitoring logger delivering continuous temperature recording and alarm indication to protect temperature-sensitive pharmaceutical inventory.

WiFi Logger

WiFi-enabled data logger delivering cloud-connected temperature and humidity monitoring with automated alerts for industrial and IoT environments.

DABECO

Humidity, temperature and water quality sensing instruments for industrial and environmental monitoring.

Official Website
www.dabeco.com

PRINCIPAL MANUFACTURER · 18 / 18

DABECO

DABECO specializes in the design and manufacture of humidity, temperature and water-quality sensing instruments, drawing on more than 30 years of applications expertise. The company serves HVAC, data center, industrial, textile and water-treatment sectors with a broad range of probes, transmitters and disinfectant sensors, backed by an experienced in-house R&D and engineering team.

Product Range

Humidity & Temperature Probes

Dew Point Transmitters

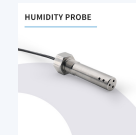

Water Quality & Disinfectant Sensors

Product Portfolio

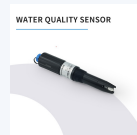

High-Temp Humidity Transmitter 400°C

Anti-pollution high-temperature humidity transmitter engineered for textile energy-saving and demanding drying processes.

Digital Humidity & Temperature Probe

Exchangeable-sensor probe rated to 120°C, engineered for reliable monitoring inside power distribution cabinets.

Digital pH Sensor (RS485)

RS485 digital pH sensor delivering stable, low-maintenance measurement for tap water and drinking water quality monitoring.

RS485 Humidity Temperature Transmitter

High-precision, EMC-protected transmitter engineered for continuous environmental monitoring in data center applications.
